Projects

Local Democratic Club Website | React, Full-Stack Integration, Data Sync

- Built a highly dynamic Single-Page Application (SPA) using React to serve as the club's official online presence.
- Implemented critical cross-application data flow by consuming the custom Node.js/Express API (from the management app) to display a live, real-time calendar of all upcoming events.
- Designed and integrated a user-facing sign-up form that sends new member data directly to the central MongoDB database, ensuring seamless synchronization with the staff's management app.

Newsletter & Events Management App | Node.js, Express.js, MongoDB, REST APIs

- Engineered a full-stack CRUD API with Express.js and MongoDB to manage a central database for mailing list members and events.
- Established real-time data sync by creating API endpoints that automatically update the external club website whenever event data is created or modified by staff users.
- Developed a dedicated Express.js API to handle user authentication for staff, ensuring secure management of sensitive member and event data.

Technical Skills

- **Full-Stack Development:** React, JavaScript (ES6+), Node.js, Express.js, MongoDB, REST APIs, Python, SQL, HTML5, CSS3
- **Platforms & Cloud:** AWS (S3, RDS, IAM), Git, GitHub, Render
- **Software & Data Tools:** Excel, Tableau, HubSpot, Strive, Scale to Win, Salesforce, Microsoft 365, Google Workspace

Professional Experience

Patient Case Auditor | ApexNetwork Physical Therapy | November 2023 – Present

- Managing and validating large datasets with over 99% accuracy, ensuring data integrity for billing and patient records.
- Identifying software workflow inefficiencies and implementing new processes, resulting in a 32% reduction in billing cycle time.

Digital Organizing Intern | Relentless | September 2024 – November 2024

- Evaluated and processed a dataset of over 98,000 applicants, applying logical criteria to filter for program suitability.
- Deployed to various teams, including SMS Recruitment, Special Projects, and Program Support.
- Provided technical support and troubleshooting for users across multiple software platforms (Strive, Scale to Win, Hubspot).

Project Engineer | Horner & Shifrin | November 2019 – June 2020 (Covid cuts)

- Documented technical specifications and project updates, improving the accuracy and efficiency of status reporting systems.
- Developed spreadsheet-based models to analyze project data, resulting in a 12% improvement in budget forecast accuracy.

Education

Bachelor of Science in Civil Engineering | May 2019 | SIUE, Edwardsville, Illinois

Additional Experience

- Co-Founder, SIUE Initiative to Create Awareness, Recognition, and Education (iCARE)
