Professional Experience

Julie Fortier for Congress | Deputy Campaign Manager, October 2025 – April 2026 | Software Engineer, May 2026 – August 2026

- Architected and deployed a full-stack campaign website and volunteer management system using React, Node.js, Express, and MongoDB, serving as the primary digital hub for grassroots organizing, with over 340 volunteers.
- Orchestrating high-level briefings with sitting federal officials to drive campaign alignment on critical district issues and secure strategic guidance for the 2026 cycle.
- Directing all volunteer operations, including managing category Team Leads and coordinating large-scale outreach efforts and merchandise logistics.

Relentless | QA Associate, August 2026 - Current | Program Organizer, May 2026 – August 2026 | Digital Organizing Intern, September 2024 – November 2024

- Evaluated and processed a dataset of over 98,000 applicants, applying logical criteria to filter for program suitability.
- Deployed to various teams, including SMS Recruitment, Special Projects, and Program Support.
- Provided technical support and troubleshooting for users across multiple software platforms (Strive, Scale to Win, Hubspot, ZenDesk).

ApexNetwork Physical Therapy | Patient Case Auditor | November 2023 – January 2026

- Managing and validating large datasets with over 99% accuracy, ensuring data integrity for billing and patient records.
- Identifying software workflow inefficiencies and implementing new processes, resulting in a 32% reduction in billing cycle time.

Projects

Julie Fortier Congressional Campaign Website & Volunteer Management System | React, Node.js, Express.js, MongoDB, Rest APIs

- Developed a production campaign website and integrated volunteer management system for Julie Fortier's 2026 congressional campaign (IL-12), serving as the digital infrastructure for grassroots organizing efforts.
- Engineered a full-stack volunteer recruitment and management platform that successfully onboarded and coordinated 340+ volunteers, featuring secure authentication, role-based access control, and real-time data synchronization.

Local Democratic Club Website | React, Full-Stack Integration, Data Sync

- Built a highly dynamic Single-Page Application (SPA) using React to serve as the club's official online presence.
- Implemented critical cross-application data flow by consuming the custom Node.js/Express API (from the management app) to display a live, real-time calendar of all upcoming events, and a live weekly poll with analytics.
- Designed and integrated a user-facing sign-up form that sends new member data directly to the central MongoDB database, ensuring seamless synchronization with the staff's management app.

Technical Skills

- **Full-Stack Development:** React, JavaScript (ES6+), Node.js, Express.js, MongoDB, REST APIs, Python, SQL, HTML5, CSS3
- **Platforms & Cloud:** AWS (S3, RDS, IAM), Git, GitHub, Render
- **Software & Data Tools:** Excel, Tableau, HubSpot, Strive, Scale to Win, Salesforce, Microsoft 365, Google Workspace

Education

Bachelor of Science in Civil Engineering | May 2019 | SIUE, Edwardsville, Illinois

Additional Experience

- Co-Founder, SIUE Initiative to Create Awareness, Recognition, and Education (iCARE)
